

DIABETES ADVISORY COALITION – MEETING MINUTES

JULY 20, 2012 COGSWELL BUILDING, HELENA

10:00-10:25AM Introductions - Sarah Brokaw	All attendees introduced themselves. Sarah gave a special greeting to our CDC Project Officer, Fred Ramsey, who was here on a site visit for the CDC Division of Diabetes Translation in Atlanta, GA.
10:25 - 11:00AM Public Health System Improvement Overview Chronic Disease Prevention and Health Promotion State Plan - Ginny Furshong - Department of Public Health and Human Services, Helena	Ginny has worked with the Public Health and Safety Division since 2004. Last fall she became the program manager for the Coordinated Chronic Disease grant from CDC, which was recently awarded to us. The grant is designed to better coordinate chronic disease programs and build on program strengths to maximize their impact. Chronic diseases are the common, costly and preventable. The goal is to share resources and move activities forward in a coordinated fashion. Each chronic program has categorized their work under settings such as schools, worksites, healthcare systems, communities and statewide as well as align with Public Health System Improvement and the Public Health Accreditation Board. If you are interested in seeing the Chronic Disease State Plan please contact Sarah Brokaw at sbrokaw@mt.gov.
11:00 - 11:15AM	Break
11:15 - 12:00PM Becoming a Certified Patient Centered Medical Home - Jay Larson, MD - South Hills Internal Medicine, Helena	The Patient Centered Medical Home concept came out in mid-2000s with the NCQA standards. Designed to provide top quality patient centered care. The physician leads a team and incorporates nurses and physician assistants in a holistic approach. Patients are able to contact medical offices electronically and receive prompt responses. There is open scheduling for acute cases. In 2008, there were 9 standards with 30 elements and 10 must pass elements with a score of 50%. In 2011, there were 6 standards and 6 must pass elements with at least a 50% score and 100 total points. The medical home concept is geared to track & coordinate care, close gaps in care, enhance access and continuity of care, provide self-care community support and save dollars by avoiding unnecessary costs by ordering tests wisely. It is patient centered. There is a required use of NCQA's survey tool. Insurance companies need to reimburse for services that allows physicians to have staff to give more time to patients. Resources mentioned included the American College of Physicians Medical Home Builder.
Noon to 1:00PM	Lunch
1:00-1:55P Linking Baccalaureate Nursing Programs to Public Health and Diabetes Donna Greenwood, MSN, RN - Carroll College Nursing Program, Helena Barbara Prescott, RNC, FNP, MA, DNP - Montana State University College of Nursing, Bozeman	Donna Greenwood from Carroll College- Donna began the discussion with an overview of the classes nursing students take from Sophomore through Senior years highlighting those classes that target diabetes. She summarized that Carroll's strengths are pathophysiology of diabetes, medication mgmt, and mgmt of emergency situations. Carroll is doing okay at basic pt education on disease and basic education on prevention of T2 diabetes. She felt there could be improvement in the area of understanding and empathy from the perspective of the person. She felt partnering with a CDE and the nursing program would be very beneficial. Discussion on outreach to Native American clinics and programs and also mental health clinics. She thought diabetes alert dogs were a

	<p>great avenue.</p> <p>Barb Prescott from MSU- At the MSU there is the influence of graduate students helping with the nursing students. When teaching urgent care, a hands-on method is very important. MSU uses lecture and simulation. With simulation, students are given worksheets with scenarios of a patient coming into an emergency room. Students are observed for cognitive competencies and psychomotor competencies. They need to know head-to- toe neurological evaluation and be able to recognize and assess. There are students in a control booth watching. It is very interactive. Barb thought partnering with QDEI would be great.</p>
1:55 - 2:10	Break
<p>2:10 - 2:55pm</p> <p>Independent Living Centers in Montana</p> <p>Joel Peden, Disability Advisor and Meg Ann Traci, PhD - Montana Disability and Health Program at the University of Montana, Missoula</p>	<p>Joel is the Disability Advisor for the Coalition and represents the Montana Independent Living Center. There are 4 offices across the state to serve 4 regions: North Central Independent Living Services 800-823-6245, Living Independently for Today & Tomorrow (south and east) 800-669-6319, Summit Independent Living Center (north and west) 800-398-9002, and Montana Independent Living Project (southwest) 800-735-6457. The Independent Living philosophy includes: 1) individual choice, 2) individual goals, and 3) self-direction. The centers strive to promote choices in self direction with peer advocacy, one-on-one peer support, group support and positive role modeling, skills training individual advocacy and information and referral. Responsibility comes with rights. Skills training include how to apply for social security, medicare, medicaid or other community resources. Also living well with a disability, working well with a disability, assertiveness/ communication, disability leadership and pride and culture. In order to advance civil rights and equal access there must be social change and system change. Please do refer patients with disabilities to one of the centers so they can receive this assistance.</p> <p>Meg Traci acknowledges both Clarisa and Joan Marie who served in the past as Disability Advisor.</p>
<p>2:55-3:00pm</p> <p>Updates from the American Diabetes Association</p> <p>Elise Coy - American Diabetes Association, Bozeman</p>	<p>Elise provided information on Tour de Cure coming up Sept 15th. Looking for volunteers to serve on committee looking at mentoring newly diagnosed parents. ADA has signed on to be a co-sponsor of MSU Bobcats football game on October 13th for a diabetes awareness day.</p>
